Cartridge Kit for Vane Motor HM Series

Features and Handling

The HM series cartridge kit is interchangeable with Vickers vane motor. It consists of a cam ring, rotor, 10 vanes, and 2 pressure plates. The cartridge is bolted together so parts can be serviced separately or as an assembly. A cartridge can be replaced without removing the unit from the machine, and usually without disconnecting the lines.

To change rotation, reverse the motor ports. No need to do anything with the cartridge.
